

Customer Information (each submission form for one customer only)

Name: Last Name:

Name on Certificates: (if different to above)

Street Address:

City: State: Zipcode:

Email:

Mob/Ph:

Results Reception

The results will be sent within **5 business days** (from sample reception at the office).
 All results will be accompanied by results certificate.

Please select **ONE** option only:

- Email (please note, all results for overseas customers will only be emailed)
- Priority Mail (1-3 days) \$8.00
- Fedex 2nd day (2 days) \$40.00

Price

Blood or Feather samples for DNA Sexing

- 1-4 birds \$ 19.90 each
- 5+ birds \$ 17.90 each

Payment Options

Please tick a payment method below. Note that samples are processed after the payment is confirmed.

- Bank Deposit: Please attach receipt for the deposit

Bank of America Account Number: 5491231603	Account: DNA Solutions Routing Number: 026009593
--	---

- Credit Card:

<input type="checkbox"/> Visa	<input type="checkbox"/> MasterCard
Credit Card Number: <input type="text"/>	<input type="text"/>
Name on the Card: _____	Exp: <input type="text"/> / <input type="text"/>
Signed: _____	

- Paypal: dnapay@dnasolutions.org
- Cheque and Money Order: Issued under **DNA Solutions**

How to take samples

- Feather:**
1. A special kit is not required for feather samples. Any envelope or plastic bag will suffice. Envelopes are preferred as they are porous and allow the sample to breathe and dry out. This reduces the chances of the samples going mouldy during postage.
 2. Label a small envelope or plastic bag with the bird's species and identification. Copy that information onto the form below.
 3. Pluck (do not cut) 2 - 3 tail or wing feathers (NOT breast feathers).
 4. Feathers should be approximately 4 - 10cm long. If the feather has blood on it, take this single feather and allow it to dry before putting into an envelope or plastic bag.
 5. Place in the labeled envelope or plastic bag and send them with a completed order form to the address below.
- Blood:**
1. Use a blood sampling kit.
 2. Label one end of the blood card with the bird's species and identification, and copy it onto the form below.
 3. Restrain the bird with a firm but gentle hold. The medial meta tarsal vein (leg) can be pricked by a pin or needle and allow a drop of blood to form, before touching the drop to the labeled blood card. Only one drop is required.
 4. Clean thoroughly or replace the pin between birds. Ensure the bleeding has stopped before returning the bird to its cage.
 5. Allow the blood to dry for at least 10 minutes before placing it into the plastic bag.
 6. Send the samples with a completed order form to the address below.
