

Dear bird enthusiast,

Thank you for your interest in DNA SOLUTIONS• DNA sexing services.

Please print these pages out, you can follow the simple instructions for taking a blood sample, and use the form provided to give us relevant information about where we should mail your sexing certificate.

I am glad to be able to send you our DNA sexing Kit. Naturally I wish to point out to you our large involvement with Avian DNA sexing, which we have been performing for aviculturists, zoos and fauna parks world-wide since 1997, where we were the first company in the USA to offer DNA sexing from normal feathers.

Currently we can offer you a special rate of:

\$19.90 per bird (for sending us 1-4 birds' blood samples)

\$17.90 per bird (for sending us 5+ birds' blood samples)

You will find these rates to be the lowest in the world, since we test many thousands of birds every year and can afford to offer low rates due to mass servicing.

There are several ways to extract the blood sample from the bird. Some decide on clipping the bird's toenail just enough to scratch the vein and allow bleeding. We recommend using a pin to prick a vein in the foot.

Results will take 2 to 5 working days, results are very accurate (above 99.9%)

Please do not hesitate to contact me with any further queries.

Yours Sincerely

Vern Muir B.Sc.

## PROCEDURE FOR BLOOD COLLECTION

**Please use basic hygiene when collecting samples: Clean hands, new envelopes, etc.**

1. Label a blood sample card for each of the birds that are to be sexed. You need to include some form of identification. The identification can be the bird's name or number, e.g. Luke 326, L89, Petey, etc.
2. Complete the form with all the requested information regarding the birds that are to be sexed.
3. Use a pin to prick a vein in the foot and absorb a small droplet of blood onto a blood card. Ensure cleaning the pin with alcohol between birds (if sexing more than one).
4. Let the blood card dry on a clean surface. Once the card is completely dry, place it into the bag/envelope and post it to us with the completed form and payment (one card per envelope).

Blood cards, sample form and payment should all be posted to us.

Please send the filled Form to:
